Whether you sell or buy drugs, guns, stolen credit cards, carding equipment, fake currency or other goods and services, you can use our secure multi-sig bitcoin escrow to pay and receive payment.

If you pay the vendor directly before receiving goods, he can scam you. If the vendor sends you goods first and then you pay, the customer can scam him.

The only secure way of payment between an anonymous customer and an anonymous vendor is a secure locker controlled by a 3rd party such as our service.

For a moderate fee, we hold the payment securely in a locker on our website until the vendor delivers the goods and services. Customer can either approve releasing the payment to the seller or he can open a dispute in case he did not receive the goods or services.
